This is grass. Any herbivore can eat grass, though the larger animals generally prefer shrubs and trees. One advantage to grass, however, is that many animals can eat simultaneously from a single patch of grass.

TLDR: If you're really willing to invest \$5 in a TERRIBLE game, go for it. But you really won't have much fun.

It's... bad. The story is difficult to follow. It looks hideous. It has horrible shapes. Everything is just boxes and triangles. No round shapes. Tons of aliasing on the graphics as well. The cutscenes are ugly as **** The fighting is pretty bad. When enemies hit you, you get stunned for a split second. You have to spam attack and constantly move backwards and forwards to make sure the enemy won't hit you, or you will die really quickly. The enemies don't drop enough coins for you to both buy a lot of health potions (no regeneration) and get some decent weapon. The audio quality is low. Pressing Ecsape instantly closes the game. You can't die more than 5 times on a level, or you have to play it all over again. It's not fun at all. And I imagine Avenged fans who don't play video games ofren will be even more frustrated.

Oh, and these powerful premium swords they were talking about in the trailers? Steam has no in-app purchases like mobiles, so you can't actually buy these swords, extra lives, or extra gold.

I have no idea what dev A7X hired to make this game, but that dev should lose the rights to make any game ever again. They are either very incompetent, or very lazy. If Avenged wasn't involved, this game would get absolutely no sales at all. It's like something from 2002.

I really love Avenged and their music, but good graphics and working mechanics will always be a number 1 in video games for me. And this game simply doesn't have either one.. Mildly entertaining, but very low-tech, as you can see from the video.

The main thing I didn't like was that the dialogue itself (which is literally the *entire game*) is *not proofread*. *There are frequent grammar errors. The game feels like it was written by a single person with little to no thought put into what would make the story better. It's not terrible, it's just not very well-thought-out.. A think a dollar per minute is a little much for any VR experience. Yeah this looks cool, but there are plenty of free VR apps that look even better. Not worth the price tag for a 10 minute experience.. Awsme game with some really cool environment, gameplay and music.*

Pros:

- + *Competitive and unique boss fights*
- + *Unique missions with very low rate of repetition*
- + *Good sidekicks*
- + *Alot of guns to use and upgrade*

Cons:

- *Simple controls but user needs time to get used to it. (don't think it's completely negative point)*
- *Some balancing is needed specially in boss fights.*
- *Some back story before tutorial should be good to involve player more in game.. A very hilarious party game to play with friends that's sometimes unfair for certain players, but that's part of the fun. It's a bit like a physics-based Smash Bros. Has excellent workshop support for near infinite stages.. Shantae is a really fun series. The platforming and action work really well and the games are clearly built with care and aesthetics in mind.*

This one was originally released as DSiWare and on iOS and the graphics do show it as a mobile port, but if you can get past that it plays well and is a great action platformer.

The movement and controls are flawless which is a big part of why i love this series. The story and characters are goofy and well designed. I've yet to beat the game, but from what I've played already it is fun and I am definitely gonna run through the whole game.. I installed that game, just for fun - and i had some fun and I think I will keep on playing. Also looking forward to the next Update, lets see what that will bring with it.

If you want some fun-gameplay, buy it :). 5/10 and only recommended if it's under \$10.

A very simple walking simulator with an OK plot and a few puzzles. The plot is interesting although I was able to figure it out well before the big reveal at the end. There are not many puzzles, so don't be looking for a Myst or Soma-like experience. You will need an occasional key or tool, but for the most part, you spend you time walking around, clicking on the few items that you can interact with, and zooming into things that will trigger the next phase of the game. It's not other games since you need to do certain things (even just retrace your steps) to trigger something like a door unlocking. It is mildly scary with a few jump scares, but this game does not have a monster that you must hide from while completing your tasks.

You can finish it in under 5 hours, and much of that will be spent walking back and forth. The wandering around and backtracking aspect of the game was annoying to me, as well as the lack of logic in what the triggers were to allow me to proceed. The menu interface is bewildering, and there is no save option, so you have to reach the next chapter in order for progress to be saved.

It's an OK use of a few hours of your time, so I would only buy it when it is steeply discounted.. While ambitious in it's feature set. with zero patches since the first. I can't recommend this over Snow.. This is a bad copy of farming simulator. You can't exit a vehicle to continue the tutorial if you remap your keys, so do not remap the keys. You will be stuck. You can hire workers to do most of the work for you, and the work completes instantly so you don't really have to do much which takes away from the game, you don't even need the equipment to hire workers to do the work.

I PERSONALY like this game, as it has everything I like: Chicken as playable character, guns, shooting chickens and a non-serious gameplay.

HOWEVER I bought it 0,49€, and I think this is the right price, because it is a poor game overall. There are only two modes, two enemies (at least for the first waves) and you can just shoot and throw grenades. You can change weapon by buying them after a looot of time. I think this should be signed as alpha, as it seems really empty. Don't buy it at full price. Its a good game a bit rough on the guns but it looks good. "It takes time to make a good game" -Steven Hawking. Well ill give it some time I guess have a good day. I like how they make hand drawn graphics and voice acting that is super cute.

This game is perfectly suitable for 3-years + kid for training memory and attention.. seams like hello neighbor but more strange. It's nowhere near finished, but it's still a very satisfying game once you get the hang of it.
